The Operation Description of Keyfob Remote Control

Date : 8, May, 2009
Prepare by : Kendy

Power to the key fob remote control is supplied by 12 V DC alkaline battery.
The CPU monitors the input from the button, if triggered it will send relevant encoded data to the (Saw based) AM Transmitter The Saw filter frequency is 433.92 MHz. After sending data the key fob remote goes back to stand by status.
